Furniture manufacturing since 1992.

Kika Mobil has manufactured furniture in the Tetovo area since 1992. Today we operate from a 3,500 m² factory and produce kitchens, wardrobes, bedrooms and project furniture for business buyers.

Each enquiry is reviewed against the drawings, materials, quantities and delivery requirements before scope and timing are confirmed. We work B2B only — with retailers and resellers, hotel and apartment projects, interior designers, and companies that need production under their own brand.

FACTORY FLOOR

B2BPRODUCTION
MODEL**Tetovo**

NORTH MACEDONIA

Your desire — our duty.

Made to order, never to stock. Every enquiry is reviewed technically before we put a price on it.

MADE TO ORDER — NO STOCK RANGES, NO FIXED CATALOGUE MODELS

Precision

Inspection points are agreed for each order and checked against the approved specification.

Reliability

Timing is confirmed after technical review and a material-availability check.

Partnership

Order scope and quantities are reviewed for each enquiry.

Direct communication

Enquiries are coordinated directly with the relevant Kika Mobil contact.

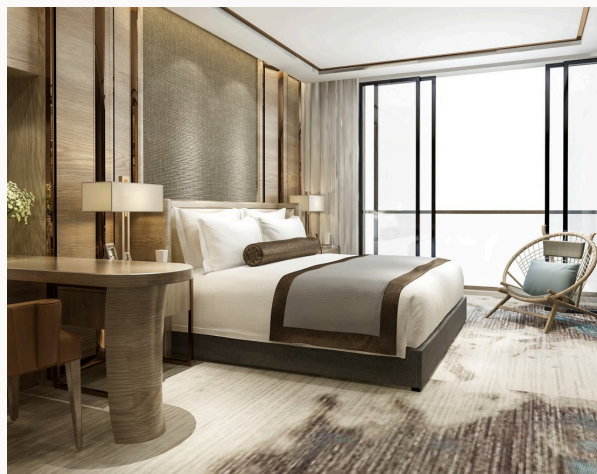

A production partner for your business.

This catalogue is written for companies and professional buyers. Ranges are made to order — we do not sell from stock — so scope, materials, quantities and timing are confirmed for each project in a written quotation.

Retailers & resellers

White-label and private-label production, reviewed by product and programme. Your brand, our factory.

Hotels & apartments

Room furniture to specification, with sample-room and phased-production options reviewed for each project.

Interior designers

Production to approved drawings, materials and finish specification, for residential and commercial interiors.

From panel to finished product.

A 3,500 m² production facility for panel cutting, CNC machining, edge banding, assembly and packing — coordinated from our factory in Tetovo.

Material specifications and inspection points are agreed per order. The production team checks dimensions, machining, edges, fittings, assembly readiness, labelling and packing against approved drawings before release. Capacity and scheduling are confirmed in writing after technical review.

01

Panel cutting

Panel cutting according to approved cut lists and material specifications.

03

Edge banding

Edge-banding requirements reviewed by material, thickness, finish and edge specification.

02

CNC cutting, drilling & routing

CNC cutting, drilling and routing according to approved files and tolerances.

04

Assembly & quality control

Assembly, inspection and packing requirements agreed for the order.

OUR PRODUCTION FLOOR — TETOVO, NORTH MACEDONIA

Contract furniture for hotel projects.

Room furniture to specification, with sample-room and phased-production options reviewed for each project.

The whole room, from one factory.

- Hotel room furniture: beds, bed bases, upholstered and wooden headboards, wardrobes, desks, nightstands, wall panels and storage
- Technical review against room schedules and approved drawings
- Sample-room or prototype option before repeat production
- Phased batches coordinated with the agreed project programme
- Packing, documentation, delivery and installation scope quoted per destination

Room scope

Beds, wardrobes, desks, panels, storage and kitchen elements can be reviewed as one package.

Material review

Materials and hardware are selected against the approved project requirements.

Delivery planning

Phasing and room-by-room labelling can be included in the project quotation.

Assembly scope

On-site assembly may be quoted after destination, access and responsibility review.

Certification & documentation

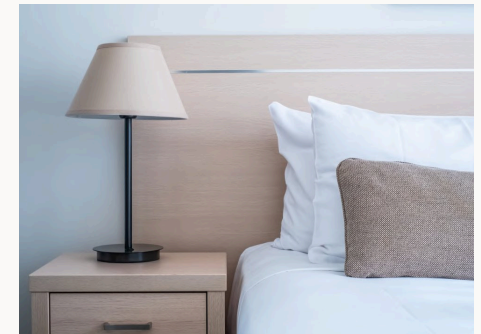

If the project requires fabric, foam or panel certification — EN 1021-1/-2, DIN 4102 B1, E1 boards — state it at enquiry stage. Supplier documentation is confirmed with the quotation.

GUEST ROOM — BED, DESK, PANELLING AND STORAGE AS ONE PACKAGE

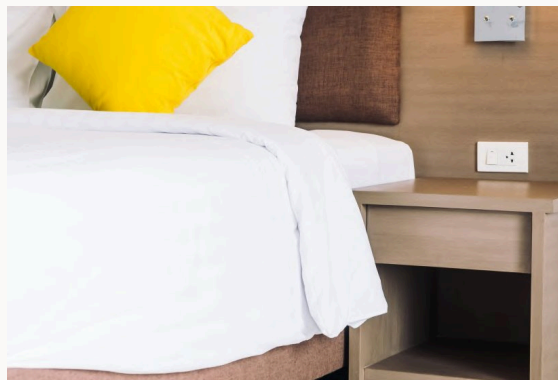

UPHOLSTERED BASE, LIFT-UP STORAGE

NIGHTSTAND & BED DETAIL

Headboards, bases and case goods.

Upholstered or wooden headboards, bed bases with lift-up storage, and matching wardrobes, desks and nightstands — produced in our own upholstery and panel departments to the approved room drawing.

03 — HOW A HOTEL PROJECT RUNS

Sample room first, then repeat production.

01

Room matrix

Send the room schedule, unit counts, drawings and target dates.

02

Technical review

Construction, materials, hardware and finishes checked against the specification.

03

Sample room

A prototype room or single unit is produced for written approval.

04

Phased production

Repeat batches run to the approved sample and the agreed programme.

05

Delivery

Room-by-room labelling, export packing and documents per destination.

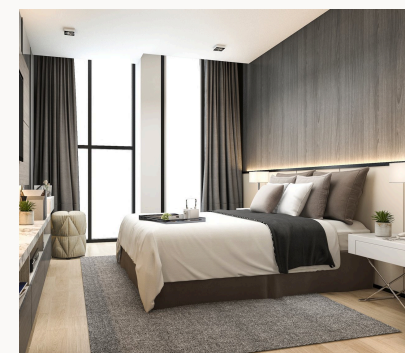

UPHOLSTERED BED WITH WALL PANELLING AND MATCHING NIGHTSTANDS

Complete bedroom programmes.

Beds, wardrobes, dressers and nightstands — for serial production and for projects.

Upholstered or wooden headboards, lift-up storage beds and matching wardrobes. Fabric, foam specification, panel construction and hardware are confirmed against the project requirement before production.

UPHOLSTERED HEADBOARDS

WOODEN HEADBOARDS

BED BASES

LIFT-UP STORAGE

NIGHTSTANDS

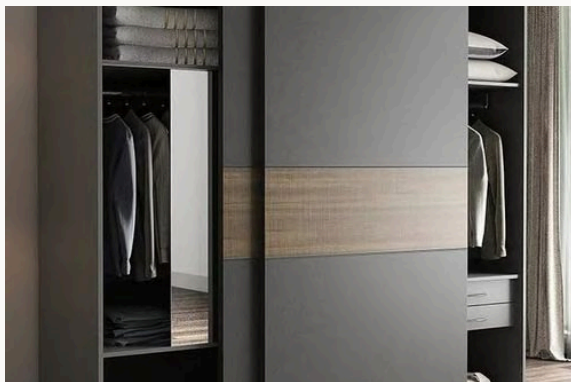

DRESSERS

DRESSING TABLES

DESKS

Built-in, sliding and walk-in.

Hinged and sliding-door wardrobes, open walk-in systems and hallway storage. Interiors are organised to your specification: drawers, baskets, rails and lighting. Glass-and-steel fronts available where the design calls for it.

Project kitchens, built to order.

From minimalist to classic — for showrooms, residential projects and designer-led interiors.

We manufacture kitchen furniture for retailers, residential projects and designers. Construction, fronts, worktops, opening systems, hardware and lighting are reviewed against the drawings and specification before quotation. Heights, widths and depths are adjusted to the layout — we manufacture to order, not to stock.

MELAMINE

PAINTED MDF

VENEER

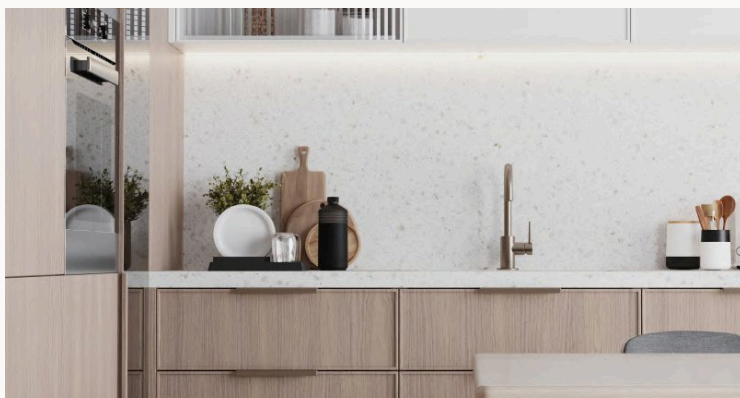

ACRYLIC

FOIL-WRAPPED

GOLA / HANDLELESS

INTEGRATED LIGHTING

Shown: melamine, painted MDF and veneer fronts with laminate, compact and stone-effect worktops. Every kitchen is designed in 3D before production so the buyer approves the layout, finishes and hardware in advance.

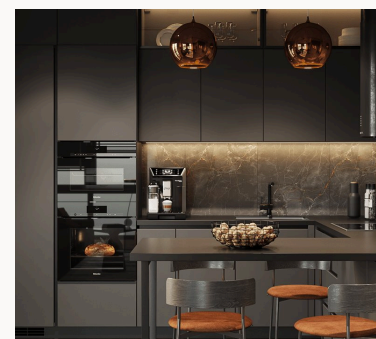

FULL-WALL COMPOSITION IN VENEER WITH INTEGRATED APPLIANCES

Wall compositions and TV panels.

TV compositions, wall panelling and display units for living rooms, lobbies and guest rooms.

From floating TV units to full wall compositions with concealed lighting and integrated display cabinets. MDF and plastic wall profiles are available where a slatted or fluted finish is specified.

Vanity, laundry and back-of-house.

Bathroom and utility-room furniture produced to an agreed material and hardware specification. Vanity units, wall cabinets, laundry storage and hallway systems — materials, finishes and hardware confirmed for the intended use before production.

Your brand. Our production.

White-label manufacturing based on approved product, packaging and labelling requirements — plus panel-processing services for manufacturers who build on their own.

- Kitchens, wardrobes, bedrooms and TV units to your approved specification
- Packaging and labelling requirements agreed for your brand
- Repeat series managed against approved technical data and control points
- Samples or trial batches scoped before repeat production
- Route- and product-specific export documents confirmed before shipment
- EXW Tetovo or delivery options quoted for the specific destination
- Payment milestones stated in the written quotation
- Panel cutting, CNC machining and edge banding quoted from your files

Minimum order

Minimum order and production scope are confirmed after technical review. Trial and repeat quantities are agreed following a capacity check.

The materials we build with.

Boards, fronts, surfaces and hardware are selected against the approved project specification and supplier documentation. Where a project requires a named supplier or a certificate, tell us and we will build to it.

Boards

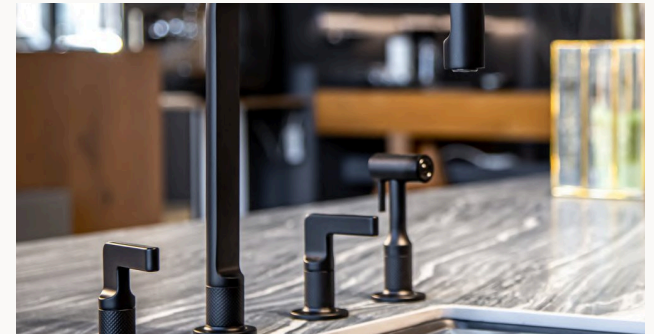

- Melamine boards — decor and texture options to the project specification
- MDF for lacquered, foil-wrapped and routed fronts
- Plywood and veneered boards reviewed per project

Fronts

- Lacquered — matte, gloss and soft-touch, to RAL or NCS reference
- Foil-wrapped — profiled and flat, PVC or PET
- Acrylic — gloss and supermatte
- Natural veneer — reviewed per project and availability

Surfaces & hardware

- Laminate and compact worktops, cut-outs to approved drawings
- Hinges, drawer systems, lift systems and organisers
- Integrated LED in cold, natural and warm white

From enquiry to delivered project.

01

Enquiry & specification

Send drawings, quantities, destination and target dates. The next step is confirmed after review of the enquiry.

02

Design & quotation

We review drawings, materials, quantity and destination before confirming feasibility, scope and price. 3D design is available where no drawing exists.

03

Production

Production runs to the approved drawings and order specification, with agreed inspection points before release.

04

Delivery

Export packing, transport coordination and documents agreed by product and route.

05

Additional scope

Any assembly scope is agreed in the written quotation after review of destination, access and responsibilities.

EXPORT & DELIVERY

Delivery documentation

Document requirements are confirmed for the offered product and route.

Delivery planning

Transport options and packing requirements are quoted for the specific destination.

Assembly scope

On-site assembly may be offered after review of destination, access and responsibilities.

Order scope

Minimum order and production window are confirmed after technical review.

Technical and commercial terms — including Incoterm, lead time, warranty, packing and any certification required for the destination — are confirmed in the written quotation for the specific order.

sales@kikamobel.mk

Send us your drawings and quantities.

Every enquiry gets a technical review before we quote. Tell us the product, the quantity, the destination and the date you need it on site.
